000000 (I'd expect something like X2 .000000 or X1 .000000). If I also download the other bits the same thing occurs, making it look like the full case is 0BA6 but the actual output for all 4 is 0BA7. From some experimenting I've deduced that if I switch out the digitalWrite with an analogWrite and have it set to 255, it then works properly (I can see the blue LED flashing) and there are no incorrect output values. So the obvious question is, why is this happening? And more importantly, can I fix this without turning the PWM output into an analog signal? A: It turns out that one of the other parts in the circuit was a constant current sink (a 10nF and 470uF capacitor, in a state where the correct reading should be -1.43V or around -1.48V). This was causing the wrong output from the Arduino to be output when this circuit was tested. As the Arduino then controlled the LED, this was masking the issue of the incorrect PWM output. Slipknot's Corey Taylor feels he has a "perfectly non-musical" voice.

The vocalist, who is a drummer in the band, has never been to the conservatory and is happy to admit that he does not have much to contribute to music. Asked what he does to express himself through his singing voice in the absence of music, he responded: "I just vocalise everything I feel. "What I actually do is I find this weird place between being non-musical and having this perfect non-musical voice. "I think a lot of people who have perfect voices for vocals think they're just singing. They sing all the time, but their singing voice is a different kind of singing. "But I don't want to talk about the business side of music, and I don't know that much about business." Corey Taylor recently said Slipknot could release a new album as early as March 2013.

The group headlined Download festival last weekend. Pitchfork.com also spoke to Slipknot bassist Paul Gray, who suggested the chances of the band releasing a new record next year are slim. "We're going to be touring pretty hard this year, and we want to make sure we get through this one [solo record]," he said. 82157476af
